HOL CHALLENGE

Opens

17 NOV | 10 AM CST | 5 PM CET

18 NOV | 12 AM SGT

Closes

18 NOV | 10 AM CST | 5 PM CET

19 NOV | 12 AM SGT

LIVE STREAMING

Talk Show Topics

DevOps <i>Unifying DevOps and Security</i>	SOC <i>Enriching SOC Visibility</i>	Hacker <i>Inside the mind of a hacker</i>
<p>Our experts share insights on the recent history of DevOps and security and how the merging of the two demands organizational change. Know how to strike the balance between agility and security in DevSecOps with best practices like - shiftLeft and automation, as well as key trends for the future.</p>	<p>Dive and discuss the state of SOC and how visibility for the SOC can be improved in current times. Enable and better prepare your security teams to take on threat actors in the future. Explore with our experts the latest trends in the industry: CISO's preference for a vendor consolidation strategy, how remote work has brought in the Zero Trust model and the necessity of detection & response (XDR).</p>	<p>In recent years, the advancement and uptake of cloud computing have eroded the traditional network perimeter, providing hackers with an ever-increasing number of access points to enterprise resources to exploit. However, much of a hacker's toolkit is also a deep understanding of the cognitive weaknesses we all have when using technology – termed as social engineering. Though many hackers are driven by monetary gain or a challenge, hackers nowadays wear various hats – and some wear it for good as well. We dive into the mind of a hacker and explore what motivates them, and how their perception might not always hold true in reality.</p>

AMERICA SESSION

Title	Session Description	Speakers
